

Transforming Energy Management

BMSI is a leading independent provider of building energy management system maintenance, providing consistent and cost effective services 24 hours a day, 365 days a year, for some of the largest BEMS installations in the country.

We additionally provide turnkey project installations, from control panel design and manufacture, electrical installation, BEMS software engineering and commissioning, through to off-site client training.

Built on successful relationships a well-maintained BEMS helps you control your energy usage, but it's the people behind it that determines success. Our service and project teams work together to understand your business inside-out so you get just what you need to ensure optimal energy management. When you work with BMSI, you'll receive constant communication throughout to ensure a consistently responsive service.

Benefits:

- Wide range of BMS manufacturers supported
- A fully integrated Energy Management solution
- Nationwide network of local regional offices
- Available 24/7 & 365 days a year

Our expertise covers maintenance solutions for a wide range of leading BEMS manufacturers and we are accredited partners of Trend, Honeywell, Cylon, Priva, TAC and Satchwell. All our regional engineers are manufacturer trained on the projects they support.

We can provide a fully integrated Energy Management solution with a full suite of products and services from British Gas.

We offer design, installation and commissioning for a full range of HVAC controls from small independent boiler rooms to fully integrated BEMS.

Our individual approach to BEMS design, installation and support has helped make us one of the UK's leading systems integrators.

Our BMS Controls & Energy Bureau enables constant monitoring and analysis of data from your BEMS. We can address and deal with issues quickly and remotely, often before our clients even know something is wrong.

CONTROLS & ENERGY BUREAU
Our team of manufacturer trained engineers brings decades of controls experience to you in everything we do

ENERGY EFFICIENT SERVICE & MAINTENANCE SOLUTIONS
Our energy audits focus on identifying energy-saving opportunities

MAJOR PROJECT INSTALLATIONS

Our engineering team works to the requirements of BS EN ISO 9001, producing a co-ordinated information package
